

# JAMAR HARRIS

harrisj1j@gmail.com | Fairburn, GA, USA | linkedin.com/in/jamar-harris/

## PROFESSIONAL SUMMARY

---

Detail-oriented and technically proficient professional with a strong background in software engineering and data processing, transitioning into technical support. Proven ability to diagnose and troubleshoot complex software and networked systems while providing exceptional customer service. Experienced in SQL, data integrity maintenance, and system checks, with a commitment to ensuring operational efficiency. Eligible to obtain and maintain federal security clearance.

## SKILLS

---

**Skills:** Axure RP 10, User Experience, HTML 5, Wireframing, Prototyping, Responsive Design, Attention to detail, Slack, TeamViewer, Splashtop, LogMeIn, Keeper, Google Docs, Service Level Agreements, SQL, customer service, tech support

**Analytical Skills:** Data Analysis, Google Sheets, Data Manipulation, Data Visualization, Excel, Performance Optimization

**Programming Skills:** HTML, CSS, C++, MS SQL Server, React.js

**UI/UX Tools:** Marvel App, Wordpress, Axure RP 10, Wireframing, Prototyping

**Technical Skills:** Microsoft Office, Windows, MS Word, Monday, Splashtop, Keeper, TeamViewer, Logmein, Slack, Berger

## EDUCATION

---

**Kennesaw State University**

*Master's, Cybersecurity*

**May 2024 - December 2025**

*GPA: 3.8*

**Kennesaw State University**

*Certification, Cybersecurity*

**August 2019 - May 2023**

**Kennesaw State University**

*Bachelor's, Software Engineering*

**August 2019 - May 2023**

*GPA: 3.5*

## CERTIFICATIONS

---

Microsoft Technology Associate: HTML 5 Application Development Fundamentals

CompTIA Network+ (Currently Obtaining)

## PROJECTS & OUTSIDE EXPERIENCE

---

**Zodiac Art, Art-Ecommerce Website**

**June 2022 - Present**

*UX/UI Designer, Website Developer (Development & Live Website)*

- Crafted and launched a personal art portfolio website, effectively showcasing artwork while delivering an engaging user experience.
- Conducted in-depth research and integrated diverse e-commerce interfaces to optimize purchasing options, significantly enhancing accessibility and usability.
- Successfully published a live website (art-of-zodiac.com) featuring intuitive navigation and a visually captivating interface.
- [Link to project](#)

**Jam's Accounting**

**January 2023 - May 2023**

*Web-Based Accounting Project Developer (School Project)*

- Engineered a web-based accounting application leveraging React and Firebase, integrating robust database management for efficient data handling.
- Enhanced user accessibility and data security, achieving a 20% increase in user engagement through improved database interactions.

**Informative Engineering, Educational Website**

**January 2022 - May 2022**

*UX/UI Designer, Website Developer*

- Crafted an educational blog prioritizing intuitive navigation and accessibility, enabling users to effortlessly explore engineering-related content.

- Developed a structured UI layout that enhances content discovery, encompassing project resources, career advice, and insights into software architecture.
- Launched a fully functional website (Informative Engineering) showcasing podcast episodes and career guidance, all presented in a sleek, user-focused design.

## **Prescription of Step Counts for Targeted Changes in Body Composition & Cardiometabolic Risk** January 2023 - May 2023 **in Overweight Adults**

### *Website Developer (Capstone Project)*

- Engineered an intuitive web interface leveraging React and Marvel App to enhance user engagement and experience.
- Partnered with a mentor to optimize data input accuracy and usability, resulting in a 30% increase in user satisfaction and successful project milestone achievement.

## **PROFESSIONAL EXPERIENCE**

---

### **Hawk-Eye Innovations**

**April 2025 - Present**

#### *Data Processing Assistant - KinaTrax, Baseball Tech*

*Atlanta, GA, USA*

- Performed daily system checks and post-game data processing to ensure accurate motion capture for professional baseball teams.
- Monitored and maintained data dashboards, flagging issues and supporting troubleshooting efforts alongside engineers.
- Managed player data updates, including roster and ID verification, to maintain data integrity across platforms.
- Completed weekly system maintenance tasks and maintained organized file structures for data processing workflows.
- Trained in KinaTrax and HawkEye systems, gaining hands-on experience with sports performance and video analysis tools.
- Conducted End of Seasons checks involving synchronizing data, clearing out sandbox data, and calibrating sites.
- Shadowed by new operators to help them gain hands-on familiarity with systems and build confidence in operating live sessions.
- Helped establish smoother onboarding by sharing best practices and reinforcing proper workflows for both operators and DPAs.
- Served as a point of reference for new DPAs, guiding them through processing workflows, dashboard navigation, and Slack channel usage.
- Provided training and support on AM Checks and basic troubleshooting, ensuring new team members developed a strong technical foundation.
- Conducted off-season data assurance projects improving system accuracy and workflow efficiency, including verifying BMC/iDRAC IPs across multiple organizations and analyzing VG processing times for site throughput optimization.
- Enhanced data documentation, validation accuracy, and operational consistency by developing standardized templates, collaborating cross-functionally, and leveraging Google Sheets and Monday.com dashboards.
- Provided day-to-day technical support and troubleshooting for in-house clients and operators, ensuring seamless operations before and during game time.
- Utilized AWS S3, GCP, and Azure to check and maintain data integrity while processing client and in-house data.

### **Springer Capital**

**March 2025 - April 2025**

#### *Front-End Intern*

*Remote*

- Designed and enhanced front-end interfaces utilizing React.js and Next.js, significantly elevating user experience.
- Collaborated with design and data teams to integrate advanced data visualization tools into web applications, leveraging extensive training in JavaScript and GitHub to elevate front-end development capabilities.

### **Springer Capital**

**February 2025 - March 2025**

#### *Data Automation / Network Engineering Intern*

*Remote*

- Streamlined the recruitment process for Springer Capital and its subsidiaries by automating workflows with Microsoft Power Automate, enhancing efficiency in quiz distribution, response tracking, reminders, and data management.
- Leveraged Microsoft 365 and SharePoint to effectively manage and analyze datasets, creating scripts to optimize extraction, transformation, and loading (ETL) processes.

### **Stem-AWAY**

**May 2021 - July 2021**

#### *Machine Learning Intern*

*Remote*

- Engineered a forum post classifier and recommender system through a structured SDLC approach, enhancing user experience by accurately categorizing and recommending posts.
- Collaborated within a team to iteratively refine the classifier, adhering to the development life cycle, resulting in a functional system that significantly improved user navigation and engagement.
